PROFESSIONAL EXPERIENCE

Software Engineer **|** Mission Communications LLC **|** June 2019 - Current

- Created elegant and pragmatic software solutions utilizing C#, SQL, .Net Framework, JavaScript, and Angular.
- Wrote logical and concise code with clear naming conventions and informative comments.
- Utilized High-Charts and Aspose for advanced data visualization.

Software Engineer **|** TransCore Atlantic LLC **|** February 2019 - June 2019

- Added Immediate value to the organization by developing new features and functionality without any formal training.
- Created clean and reusable Angular UI based on SQL table structures, JSON data, and visual designs.
- Utilized JavaScript Promises to consume Restful APIs and prevent runtime errors.

Software Engineer **|** Nurepublic INC **|** April 2018 - January 2019

- Translated the design team's wireframes into responsive, interactive features, using HTML/CSS, JavaScript and React.
- Added new CRM features using Node, Express, and Angular with an MVVM approach to software architecture.
- Fluidly managed multiple tasks in an agile, dynamic, and high-pressure environment.

Front-End Web Developer **|** Club Essential LLC **|** June 2017 - April 2018

- Hit the floor running picking up Club Essential's methods, CMS, and team dynamics with no formal training.
- Used HTML, CSS, JavaScript, and jQuery to convert client content into functional web pages.
- Introduced innovative solutions to improve efficiency that are still used company-wide.

Front-End Web Developer **|** Cingularity Design LLC **|** November 2014 - June 2017

- Crafted responsive and user-friendly web experiences from beginning to end, using Angular and React.
- Utilized SEO, analytics, Adwords, and social media marketing to drive site traffic and increase online presence.
